

MONARCH®

PAINTED POROUS MACADAM

Charles
LAWRENCE
SPORTS SURFACES

Monarch® is an economical and durable hard multi use games area suitable for clubs, schools and public or private courts. It consists of a base of open textured porous macadam with a spray-applied colour surface coating.

Because of its relatively low price and year-round playability, porous macadam is the most widely used tennis surface in the UK today. Monarch's colour coating protects and upgrades the basic macadam surface, adds slip-resistant fillers for good grip underfoot and extends the life of the court surface. **Monarch®** also provides an ideal base for upgrading to a polymeric or artificial grass surface as funds become available.

MAINTENANCE & RENEWAL

Routine maintenance: Remove all loose debris. Inspect annually for growth of moss or weeds and to check condition.

Professional maintenance: Apply moss/ weedkiller as necessary. Every 1 - 2 years, pressure-wash the surface to remove dirt and maintain porosity. After typically 3 - 5 years, respray the court with a new colour coat.

FEATURES & BENEFITS

Low initial outlay and low maintenance costs.

Consistent hard-court playing characteristics ideal for all levels of play.

Attractive slip-resistant coating extends surface life.

Two-colour options give even better visibility.

Free-draining construction allows play in wet weather.
