

CASE STUDY

DONCASTER HOCKEY CLUB

With over 40 years experience of installing sports surfaces, Charles Lawrence Surfaces is one of the foremost sports & leisure contractors in the United Kingdom.

We are continually exploring new engineering and construction methods to enable us to deliver the best construction; we also work with Europe's leading synthetic grass manufacturers to ensure that we can offer the best surface solution for each individual client's requirements. Our aim is to provide quality installations at competitive prices, all delivered via our professional and approachable team.

We operate nationwide and are able to undertake works ranging from the smallest repair right up to multi-million pound stadia schemes involving the construction of changing facilities, clubhouses and stands.

The client on this project was Doncaster Hockey Club. All works were completed in an 8 week timescale.

Doncaster Hockey Club

- Area of the pitch was 6395m² with TigerTurf EvoPro sand dressed carpet installed onto a new 15mm shockpad including line markings for hockey
- This was a refurbishment of an existing synthetic pitch
