

CASE STUDY

BITTERNE PARK SCHOOL, SOUTHAMPTON

CHARLES LAWRENCE
SURFACES

With over 40 years experience of installing sports surfaces, Charles Lawrence Surfaces is one of the foremost sports & leisure contractors in the United Kingdom.

We are continually exploring new engineering and construction methods to enable us to deliver the best construction; we also work with Europe's leading synthetic grass manufacturers to ensure that we can offer the best surface solution for each individual client's requirements. Our aim is to provide quality installations at competitive prices, all delivered via our professional and approachable team.

We operate nationwide and are able to undertake works ranging from the smallest repair right up to multi-million pound stadia schemes involving the construction of changing facilities, clubhouses and stands.

The client on this project was Bitterne Park School, Southampton. This was a construction of a new all weather pitch consisting of soakaway, subsoil reinforcement, stone sub base, the introduction of a macadam layer and shockpad on a formation by others. All works were completed in a 10 week timescale.

Bitterne Park School, Southampton

- Area of the pitch was overlaid with Domo Duraforce XSL 60-14.5 3G carpet including line markings laid over a shockpad
- A retaining wall, fencing and kerbs were completed by others
- Two boot wipers were installed
